SUMMARY

I am excited about the possibility of contributing to dynamic and supportive environments, bringing fresh perspectives to challenging projects.

The idea of combining my tech skills with hands-on client interactions just clicks for me. I'm all about finding practical solutions and make a real impact.

SKILLS

CoreXM, CXD, Integrations, SSO, Java, SQL, JavaScript, HTML, CSS, Salesforce, Azure, ServiceNow, Confluence, Jira, Cybersecurity, Agile, ITIL, SCRUM.

Collaborative, Transparent, Communicative, Leadership, Responsible, Quick learner, Proactive, Critical thinker, Innovative, Goal-oriented.

EXPERIENCE

- 06/2024-Current **Enterprise Support, Senior Specialist** Qualtrics
- As a Senior Specialist, I work closely with nominated clients across the NA, APJ, and EMEA regions to drive product adoption and deliver value through proactive support, including training sessions, regular check-ins, and best practice guidance. I take ownership of complex technical issues, ensuring timely resolution and minimizing disruption to the client experience. By managing escalations end-to-end and coordinating with account and engineering teams to maintain transparency and trust during the process.
 - Throughout this experience, I have enhanced my management and leadership skills by working closely with multiple teams in supporting clients. This role has involved sharing knowledge, troubleshooting skills and providing guidance on managing client sentiment, determining the best approach to clients, and gaining a deeper understanding of the issues, ultimately leading to improved resolution times and ensuring client satisfaction.
- 06/2022-06/2024 **Systems Engineer** Infosys
- As a Specialist Engineer Support at an international healthcare company, I focused on efficiently resolving incidents and service requests related to various applications within the Salesforce ecosystem. Leveraging ServiceNow as our primary ticketing and support management tool, I contributed to a major project that sharpened my skills in issue identification, effective communication, and resolution strategies. I ensured the continuity and reliability of critical platforms that support daily operations, maintaining both efficiency and user satisfaction in the dynamic, fast-paced global healthcare environment. In addition, I developed strong client-facing experience by actively engaging with stakeholders to understand their concerns and provide timely, effective solutions. This dual focus—technical problem-solving and stakeholder communication—has enabled me to deliver solutions that not only meet operational requirements but also drive broader business value.
 - As a Support Engineer at a leading investment banking services firm in the U.S., I played a key role in a high-impact project focused on ensuring system reliability and performance. Leveraging my expertise in Unix, SQL, and Java environments, I efficiently diagnosed and resolved complex technical issues, often under tight deadlines. I collaborated closely with clients to extract and analyze critical information, ensuring their needs were met while minimizing system downtime. My contributions were crucial in maintaining the stability and smooth operation of essential financial systems in a fast-paced and highly regulated environment.
- 01/2021-04/2022 **Technical Supervisor** Centro de Desarrollo Aeroespacial (CDA) – IPN
- During this time, I carried out a project about optical communications with satellites, specifically with CubeSats. There I worked with waterfall methodology to accomplish the tasks, where they were focused on designing, developing, and simulating an Earth Station In Motion (ESIM) for optical satellite communications using one-link for payload and two-link for telemetry, using technologies as LPWAN, LoRa, LoRaWAN and IoT. I used Matlab for programming the simulation of the logical layer using features as RF tools, Signal Processing and DSP System Toolbox, also I made an extensive analysis SWOT and PEST of the project.

EDUCATION

- 08/2017-06/2022 **Bachelor of Engineering** Instituto Politécnico Nacional
- Major in Communications and Electronics Engineering with a focus on computing.

VOLUNTEERING

- 03/2022-01/2023 **Student Ambassador Alpha** Microsoft
- I joined Microsoft's volunteer initiative to support peers and local communities in leading technology-focused groups and fostering the development of future-ready technical, social, and professional skills. These include programming, critical thinking, analytical reasoning, active learning, leadership, innovation, and self-management skills such as resilience, stress tolerance, and adaptability.

CERTIFICATIONS AND COURSES

- Qualtrics Platform Essentials Certification
- Qualtrics CoreXM Expert Certification
- Infosys Certified Database and SQL Professional
- Infosys Certified Backend Layers Developer
- Infosys Certified Software Programmer
- Infosys Certified Global Agile
